

# TRADE PULSE: REAL-TIME TCA

Obtain immediate access to results you need to manage and react to multi-asset trading costs.

Trade Pulse, our proprietary real-time trading analysis tool, enables you to evaluate strategies, make decisions, understand overall performance, and monitor trading results as you work orders.

Real-time results allow you to follow your progress at the portfolio and order level, helping you make the right decisions at all times. The tool features a convenient interface that displays results in an easy drag-and-drop format, offering you the ability to focus on what matters most.

## LARGEST POSSIBLE UNIVERSE

Our TCA platform captures the largest global peer benchmark universe with trillions in fixed income, foreign exchange, equities, and futures. Benchmarking data is included at no additional cost.

## FUNCTIONALITY

- ◆ Trade alerts and heat map visuals are dynamically refreshed.
- ◆ Pre-trade cost estimates are derived from empirical data.
- ◆ Displays cost to complete strategies.
- ◆ Add to an existing or completed trade.
- ◆ Fill-level roll ups and/or volume participation indicators.
- ◆ Options for pivot table view, grouping plus export functionality.

A trader with the right information can control the factors that reduce overall execution costs. Knowing the landscape in detail and the liquidity risk of portfolios will help your firm develop successful strategies for execution.

## WHY ANALYZE YOUR TRADES IN REAL-TIME?

- ◆ Take action as you quickly monitor portfolio and single stock trades.
- ◆ Easily identify securities that are moving away from your stated benchmark.
- ◆ Quantify trade costs at any given moment.
- ◆ Evaluate broker venue selections.
- ◆ Produce measurably better trading results.
